

GstarCAD

About

Suzhou Gstarsoft Co., Ltd is the recognized leading provider of 2D/3D CAD software and solutions for the industries involving AEC, mechanical and manufacturing, electrical and electronic, civil, GIS, survey and mapping, etc. With more than 19 years of proud history of technology innovation and practical application, GstarCAD software is dedicated to providing the fast, powerful and DWG-compatible CAD software for our customers and partners worldwide.

GstarCAD

Fast, Powerful & DWG-compatible CAD Software

What is GstarCAD 2011?

GstarCAD 2011 is the newly released 2D/3D CAD platform software based on IntelliCAD for the industries involving AEC, mechanical and manufacturing, electrical and electronic, GIS, survey and mapping, civil, etc.

GstarCAD 2011's AutoCAD-compatible GUI, data format (DWG/DXF), APIs and stable operating platform will ensure you design easier and faster.

- ◇ Full Compatibility with AutoCAD 2.5-2011
- ◇ High performance at an affordable price
- ◇ Powerful APIs for smooth transplantation

What's New in GstarCAD 2011?

GstarCAD 2011 is a milestone version in capability, operability and practicability compared to the previous version of 2010. Its optimized GRX technology, enhanced performance and newly added functions based on global customers' diversified demands offer a productive and profitable feature set:

- ◇ The Ribbonized user interface brings you much convenience
- ◇ The substantial function improvement enables you to work more efficiently
- ◇ The rise of performance makes it easier to get your work done

From 15th June to 31st August

Flexible Operation via Ribbon GUI

The newly added Ribbon GUI provides stylish and customizable menu appearance, including menu, toolbar, status bar and command line. Ground color configuration of Ribbon GUI is available and there are 4 color options (Blue, Black, Silver and Green) for your preference.

Configurable and extendable Ribbon enables you to find well-used commands more quickly and directly. You are able to minimize function zone to obtain more space in design operation. Meanwhile, customizable Quick Access Toolbar is designed to meet your specific operation requests and habits.

(Classic)

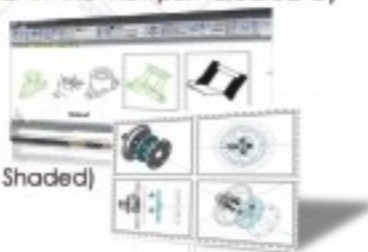

The classic GUI is still available with switch option to Ribbon GUI. You can select either classic or new Ribbon GUI. The classic GUI of 2011 also provides color configuration with 4 color options.

Improving Efficiency by Enhanced Functions

(1) Highly Enhanced 3D Functions

Profile of 3D Solid Model (Solprof, Solview, Soldraw)

Solprof automatically creates projective profile of 3D solid model in paper space, consisting of visible lines and hidden lines placed into different layers. Solview creates viewport with orthogonal projection. Soldraw meanwhile generates profile and section of 3D solid model in the viewport created by SOLVIEW

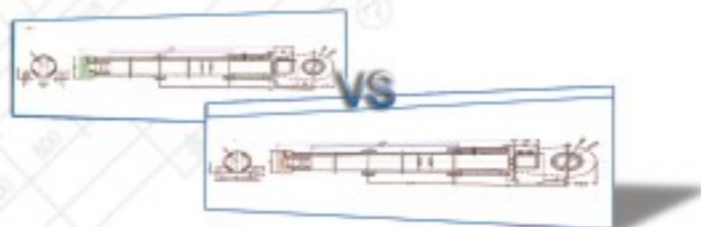

Shaded Plot in Layout

Shaded Plot is available to preview, print, or publish object set in viewport. You can select different visual styles (Displayed, 2D wireframe, 3D wireframe, Hidden, Shaded) for shaded plotting.

New Drawing Compare

Based on GRX technology, New Drawing Compare in GstarCAD 2011 handles custom object and nested object in block and comparison result is visualized and accurate, showed in predefined colors; thus, you can verify even the slightest modifications in similar drawings.

Unique and Featured Functions

Besides AutoCAD-compatible drawing functions, GstarCAD provides a great quantity of unique and featured functions, which greatly satisfy users from various industries.

More Powerful Application Program Interface (API)

Lisp/Vlisp/VBA

In GstarCAD 2011, compatibility and reliability of Lisp and Vlisp are further strengthened, and 4 classes of VBA are newly added as well, such as GcadHyperlinks, GcadHyperlink, GcadPlot and GcadTable, which make GstarCAD 2011 more compatible with that in AutoCAD.

GstarCAD 2011 Product Versions:

- GstarCAD Professional
- GstarCAD Standard
- GstarCAD Academic

GstarCAD 2011 Language Versions:

- English, Spanish, German, French, Chinese Simplified, Chinese Traditional, Czech, Italian, Japanese, Korean, Polish, Russian, Hungarian

Runtime Environment:

- Configuration requirements for operating environment
- Microsoft Windows 2000, 2003, XP, Vista, Windows 7
- Intel Pentium (or faster) Processor
- Minimum 512M RAM (above 1G RAM recommended)
- More than 300 MB Hard Disc (above 1G recommended)
- CD-ROM drive needed if installing from a CD
- Mouse or other coordinates input devices
- Color Monitor
- Output Devices (Printer or Plotter)
